STEP TWO: MOUNT THE TABLE STAND

** Power cable for reference only. Your power configuration may vary.*

SUPPLIED HARDWARE
• 5" long Hex Key
• 3/8" Pan Head Screw
• Snap Cover

A. Position the stand, and fasten with the supplied screw and snap cover (**A2**).

B. Route the supplied USB cable through the top opening, leaving 8" of free length at the top, and press the cable into the strain relief slot (**B2**).

C. Set the viewing angle with the supplied hex key.

⚠ STOP HERE and go to "2. ACCESSORIES" if you have a peripheral to connect. Otherwise, continue to STEP THREE.

STEP THREE: ATTACH HEAD UNIT TO TABLE STAND

SUPPLIED HARDWARE
• 2-1/2" long Hex Key
• 4x Flat Head Screw

Interactive Kiosk™ Wall Mount for 12.9-inch iPad (Gen 3)

STEP ONE: DETERMINE MOUNTING HEIGHT AND LOCATION

Level the mount or template at the desired location on the wall, and mark the hole locations. Drill a pilot hole at each location and secure Wall Mount with supplied fasteners*.
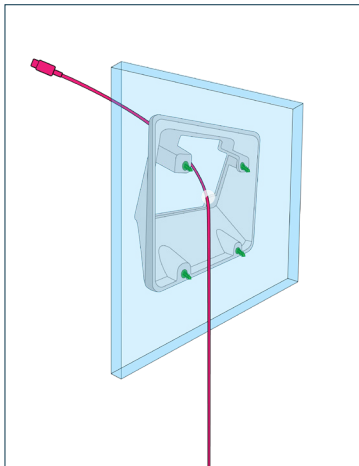

SUPPLIED FASTENERS
- 4x Phillips Wood Screw
- 2x Snap Cover
- 4x #10 Toggle Bolt

Aila provides hardware for securing to studs and drywall. For all other surfaces, choose an appropriate #10 fastener.

*For information on how to install toggle bolts, **click here and visit: https://bit.ly/2KX0zcQ***

STOP: PREPARE FOR POWER

Route the supplied USB cable through your power openings. Your power openings are specific to your site.

⚠ STOP HERE and go to "2. ACCESSORIES" if you have a peripheral. Otherwise, continue to STEP TWO.
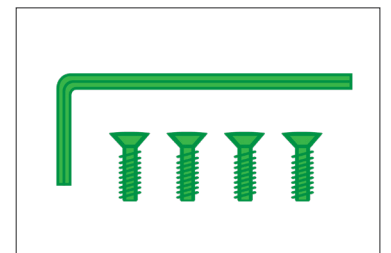

STEP TWO: MOUNT THE HEAD UNIT

Orient the Kiosk enclosure with the Kiosk mounting holes (**A**), and fasten it with the supplied wrench and flat head screws.

SUPPLIED HARDWARE
- 2-1/2" long Hex Key
- 4x Pan Head Screw

Interactive Kiosk™ 12.9-inch iPad (Gen 3)

### 1. GET STARTED

Kiosk keys and a key fob included in box

On the back of the unit, insert the kiosk key into the barrel lock and twist to unlock the front panel. Remove the faceplate from the kiosk by pulling the left side of the plate first, and then unhooking the right side. Remove the kiosk key from the back of the kiosk.

### 2. CONNECT THE CABLES

Power source

A. Feed the provided Anker USB-C power cable through the kiosk and plug it into a power source. **B.** Route the Anker USB-C power cable through the cable paths and plug it into the port labeled "Power In."
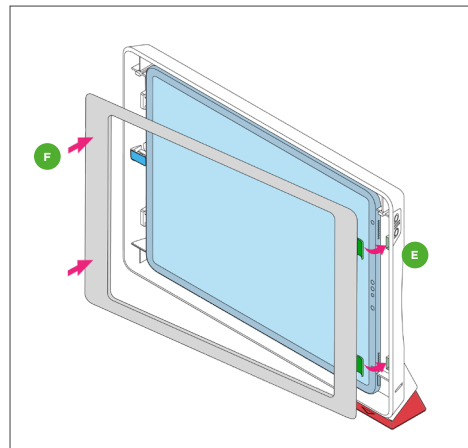

C1. Plug the Apple-provided USB-C cable into the port labeled "**iPad**."**C2.** Secure the other end of the Apple-provided USB-C cable along the left-side cable path and beneath the strain release (small black tab). Close the strain release, securing the cable (shown in green). **D.** If you have accessories, use **Port 1** & **2**. Secure your cable(s) with the bottom cable path.

3. CONNECT THE iPAD

**D.** Plug in the iPad and place it into the kiosk

DETAIL: *Apple USB-C plug flips up and over to fit flush between the iPad and Kiosk wall.*

E. Reattach the faceplate right (or "hooked") side first. Slide the tabs into the enclosure, and firmly press down on the left edge (**F**) to fully engage the latch. **TIP:** *be sure to remove the kiosk key from the back of the kiosk before securing the faceplate.*

4. POWER UP

To power-on the iPad, use the provided access key fob to press the power button on the lower right side of the kiosk.
